

- We offers a full line of cable glands with high quality
- Our Glands are manufactured as standard in BRASS. Alternative material includes ALUMINIUM, MILD STEEL & S.S.
- They are able to provide earthing, grounding, bonding, insulation, and strain relief.
- The main function of the cable gland is to be a sealing device which acts to ensure the protection of enclosures on electrical equipment
- Cable glands are able to repel external contaminants such as dirt, dust, or fluid, and can contain an electrical spark or a flame
- Safe ,reliable & easy for installation
- Fully weatherproof.
- Environmentally friendly.
- Low price guarantee and Competitive short delivery time.
