

Electrical & Energy Audit

We provide two types of Audits, Energy Audit and Electrical Safety Audit. We do it for commercial buildings, offices and Industries.

Energy Audit	Electrical Safety Audit
Electrical Energy Audit is requirement of Australian Commonwealth legislation.	In safety audit, we follow safety regulation 2011 and Australian standards like AS3000, AS3100, and AS61502.
We go through all energy parameters to find solutions over losses, and energy leakages	We focused on SIL and CAL levels of electrical installation.
We focused on providing renewable energy to support the greenhouse challenge program.	We do Safety Audit to reduce hazard, damages, injures, and accidental killing.
Our audit will be going to give you quick ROI.	We assist many clients on management plans.
